

AICOM

Welcome to AICOM Fiber
Take Control with Pure Fiber
Internet Access

AICOM Fiber offers a head start into the future of communication for your residential and business developments. AICOM guarantees high speed Wi-Fi in common areas of your property, with effective business internet for your office spaces.

We proudly offer the highest quality of internet access without contracts!

AICOM hand delivers a dedicated fiber loop to one specific property at a time. Our service agreements do not allow our connection to be utilized above 75% bandwidth without an automatic increase, which allows for true fiber network access.
No more sharing the bandwidth you pay for with your entire neighborhood!

AICOM's networks are connected directly from central data centers, not split off to remote offices like large cable and fiber providers, and much more secure than the average cable company.
You never have to worry about buffering and lag during peak times!

AICOM offers a percentage of monthly subscription net profits earned on the property when the property commits to an investment in the project. **Bulk rates and co-op options available!**

Tenant Benefits Include:

- Residential and Business Packages start at \$45
- One time \$50 charge for standard installation (custom installations require a survey and quote)
- Free unlimited Wi-Fi for residential subscribers in common areas where AICOM Fiber is available!

More than

1,000 *businesses and homes installed since 2002!*
